

Our Influenza Vaccination COMMITMENT

As part of our commitment to the well-being of our patients, this practice is dedicated to offering annual influenza vaccinations, as well as complete and up-to-date information on influenza, also called the flu.

The Centers for Disease Control and Prevention (CDC) and other leading health organizations recommend annual influenza vaccination for:

- ✿ All persons who want to reduce the risk of becoming ill with influenza or of transmitting influenza to others
- ✿ All children 6 months through 18 years of age
- ✿ Anyone 6 months of age or older with certain chronic medical conditions (e.g., diabetes, asthma, heart disease, compromised immune system)
- ✿ Pregnant women
- ✿ People who live with, care for or come into close contact with persons at risk
- ✿ People 50 years of age and older
- ✿ Health care professionals
- ✿ Residents of nursing homes and other chronic-care facilities

**If we don't remind you about annual flu vaccination for yourself and your family, please remind us.
If you're not sure who in your family should be vaccinated, we encourage you to ask.**
